AIM: To create a static website on Amazon S3 using AWS system manager.

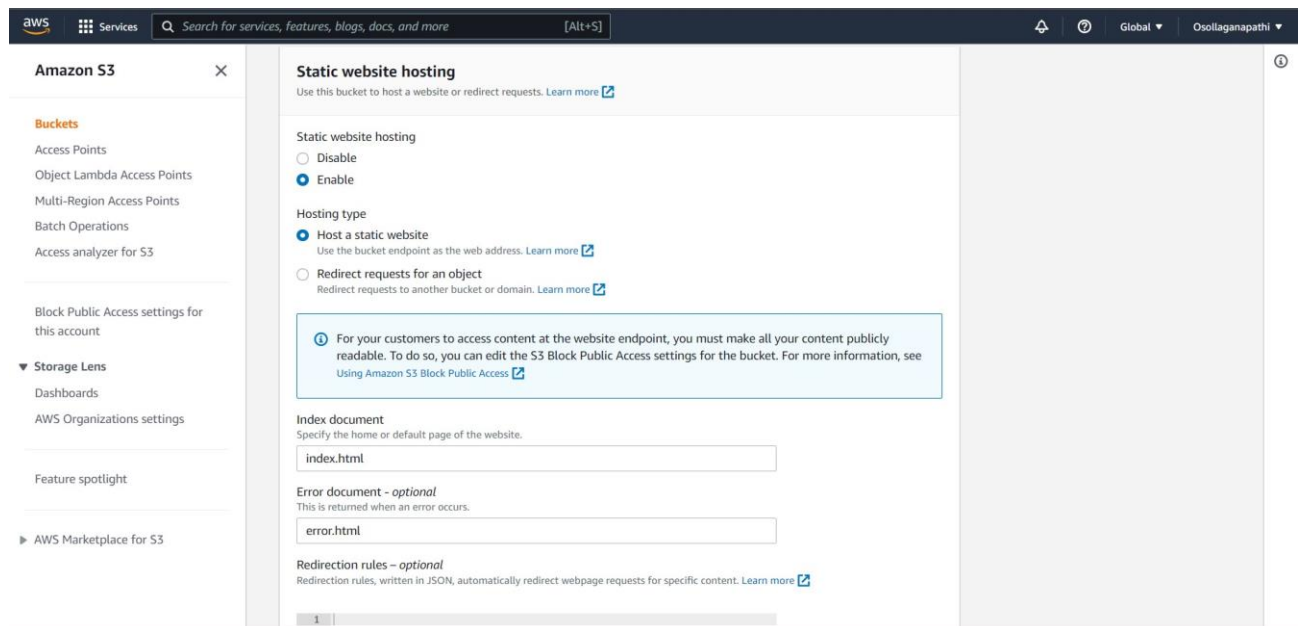

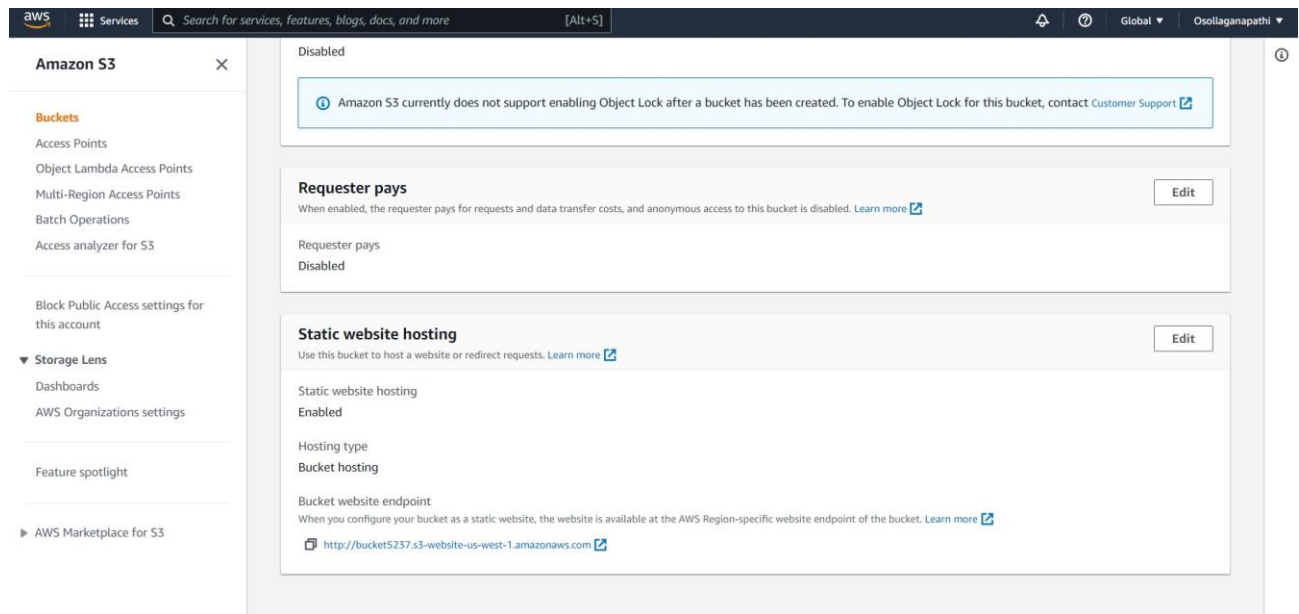

PROCEDURE:

- 1) Sign in to the AWS Management Console and click on Amazon S3 Console at <https://console.aws.amazon.com/s3/>.
- 2) Click on create a bucket.
- 3) Enter the name of the bucket and the region you want to create it in
- 4) Accept the default settings and then click on create a bucket

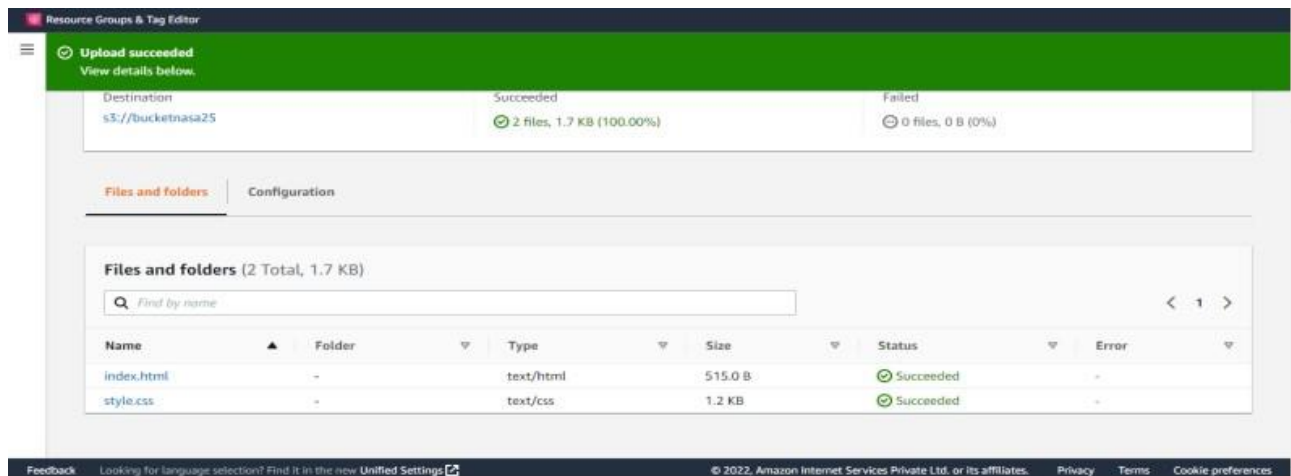

- 5) In the buckets list, click on the bucket you just created and choose properties, then under static website hosting click the enable option.

7) After configuring the website you can use the endpoint to test the website out. 8) choose the name of the bucket you just configured and then choose permissions under that block public access will be visible, click on the edit option and save the changes.

9) under the bucket permissions there will be a bucket policy, click on that and paste this code into the bucket policy editor:

```
{
  "Version": "2012-10-17",
  "Statement": [
```

RA2011028010054
Jayanth Sai
Yarlagadda

```

{
  "Sid": "PublicReadGetObject",
  "Effect": "Allow",
  "Principal": "*",
  "Action": [
    "s3:GetObject"
  ],
  "Resource": [
    "arn:aws:s3:::Bucket-Name/*"
  ]
}
]
}

```

10) Click on save changes

11) Under the buckets, choose the name of your bucket which you just created, and in the properties, choose a static website hosting - then choose your bucket endpoint 12) Now you can access your website as it has successfully been hosted.
